

SCR MOTORSPORT 2010

SCR Performance is proud to announce that Savannah Rickli has been signed by SCR to manage her burgeoning career. The SCR management team, consisting of Mark Baer and Grant Barclay, will be assisting the progress of Savannah's career in areas related to marketing, car control and race logistics.

Savannah Rickli is a 16-year-old Junior at Dakota Ridge High School in Littleton, Colorado. Savannah started karting at the age of 11, but her love for racing began much earlier than that. Being born into a racing family, speed has always been in her blood. Driving her kart, Savannah finished the 2006, 2007, and 2008 seasons with the Class Championship. Savannah also finished the 2006 season sixteenth in novice points for the Rocky Mountain Region of the SCCA. In 2008 Savannah finished 7th in class at the SCCA Solo Nationals in Topeka, Kansas and she also actively participates with the National Auto Sport Association (NASA). Savannah also enjoys helping to instruct Tire Rack Street Survival programs around Colorado. When Savannah isn't racing, she maintains a 3.5 GPA and is a very dedicated student. Savannah enjoys volunteer work and helping out in her community. She works out on a regular basis to maintain her physical best. Most recently, Savannah finished in the top ten percent of drivers in order to qualify for the final selection of the Pro VW TDI series in Las Vegas, NV.

SCR Performance has been following Savannah's career for the last six years. We have watched her progress to where she is today and are happy to help her succeed. We expect great things from this young driver and will be helping her each step of the way. Besides SCR Performance managing her career and car set-up, she will be provided with driver training from two of the SCCA's leading instructors and competitors - - Mark Baer, the owner of SCR, and Grant Barclay, owner of Built-By-Bones fabrication. Both these men have proven success in local and national motor sport venues. Grant has been involved in motor sport for over 25 years involving F1, Indy car, sports car and Pro Rally racing. Mark has been involved in local and national road racing, auto-X and time-trials for several years as well.

SCR Performance is located in Loveland, CO. We have been in business for 6 years and specialize in comprehensive, high-performance vehicle development as well as motor sport logistics and track support. SCR drivers have won numerous podium finishes and championships, which has given us a reputation for the excellence we've come to expect from our company and our drivers.
